NURSERIES**

**POMFRET CENTER
CONN.**

LANDSCAPE GARDENERS AND FORESTERS

Address

ROLAND E. BAKER, Proprietor

Pomfret Center, Conn.

TELEPHONES: Putnam Division 288-2 and 288-3

INTRODUCTION

The name "Hiti" signifies high elevation, which gives a longer season, free from early frost and injury to late growth.

This catalog contains only a list of plants grown at Hiti Nursery, **but stock of all kinds is furnished. Prospective buyers are invited to call at the Nursery or write to Mr. Roland E. Baker and discuss their wants.**

Telephone or telegraph Mr. Baker the day previous to your coming. Visitors to the Nursery between April 1st and November 1st will find some one at hand during business hours to show the stock and take orders.

Large sized stock in quantity can be delivered economically by auto to arrive in perfect condition.

All deliveries F. O. B. carefully put up ; **packing at cost.**

ROLAND E. BAKER, Proprietor.

Pomfret Center, Connecticut.

TREATMENT

Plans for large areas or places are designed and carried out by a landscape engineer of recognized ability, so that no customer need feel that his particular want cannot be wisely and economically treated.

Sometimes a simple visit of inspection will afford sufficient data for a customer to attend to the affair himself, and the mere removal of overgrown or unsightly trees and shrubbery on an old place will work wonders in rehabilitation. By all means consider this phase of the situation carefully, as we always wish to bring out or advise the best and wisest course under varying circumstances.

STATE ENTOMOLOGIST

NEW HAVEN,
CONN.

No. 2192

Date—AUGUST 24, 1933

CONNECTICUT AGRICULTURAL EXPERIMENT STATION

NURSERY INSPECTION AND REGISTRATION

Certificate

This is to certify that **HITI NURSERIES** of Pomfret Center, Conn., has registered as a Nurseryman, that the nursery stock has been duly examined in compliance with the provisions of Chapter 265, of the Public Acts of 1925 (Sections 2135-2140, General Statutes, revision of 1930), and that it is apparently free from dangerously injurious insects and plant diseases.

This certificate expires August 1, 1934,

W. E. BRITTON,

State Entomologist.

NOTICE

We have a considerable number of large Specimen Evergreens, mostly Yews, that it is almost impossible to catalog, so as to afford an adequate description.

These are priced to the visitor on examination at the Nursery, and we find them very useful for adding a last touch of beauty to any landscape finish.

Also a good sized assortment of new varieties that are of smaller size that we shall be glad to show, and thus introduce them to your notice in advance, for later adoption.

It will be well worth your while to see these.

Evergreens.

85	"	"	12-15 in.....	1.50
50	"	pungens aurea,	5-6 ft.....	18.00

A seedling from this Nursery.

Golden Evergreens usually show this color most distinctly in the spring and early summer, on the new growth.

This Spruce, on the contrary, is at its best during cold autumn and winter weather, and is therefore unique in its field of light yellow color.

				Each
10	<i>Picea pungens</i>	Bakeri,	6-7 ft. Specimens.....	45.00
50	"	"	2½-3 ft.....	12.00
30	"	"	18-24 in.....	6.00

We believe this to be the best BLUE TYPE on the market today among the entire evergreen group. A product of this Nursery. Carefully grown from CUTTINGS ONLY, so as to insure the best results.

Stocky, well-furnished specimens.

The Japanese Yews (*T. cuspidata*) are of exceptional hardiness, good coloring, and generally speaking, by far the most satisfactory of the entire Yew family; and we therefore confidently recommend their broad use for many purposes.

The handsomest forms have been carefully selected and stock of these grown from outdoor cuttings so that the result is sure and exact. We urge prospective customers, or simple visitors, to inspect these young plants and see for themselves their intrinsic beauties. If, however, distance or inconvenience interfere with personal selection, we will gladly make this choice for you if a general statement of planting conditions are given us as a guide to a wise furnishing of what is really needed.

Many old customers living at a distance request us to forward to them from time to time any new or desirable things that we have come across in our Landscape work.

RECOMMENDATION

Some customers would like a little advice or suggestion as to what plants to use or order from the Nursery, and we wish to provide for this.

For example—there are quite a number of varieties, specially among the evergreen group, that are new and desirable for small places or gardens and if the selection is left largely in our hands we are confident the result will be much more satisfactory. Evergreens of small size should be used in all instances where immediate effects are not imperative.

CONCLUSION

Our customers today include house architects, landscape designers, or consultants and nurserymen.

Many women are taking up this outdoor garden work professionally, or otherwise, and their advent makes a distinct and valuable addition to opportunities presented to the general public for careful consideration, as women seem to have an especially keen sense of beauty in the arrangement of Garden Flowers.
